Results-driven **Senior Technology Leader** with demonstrated success designing technological strategies to drive business transformation, improve efficiencies, and reduce costs. Regarded as a thought leader with a strong record of successfully aligning goals, defining vision, and driving organizational growth through technology. Sound business and technical acumen with a passion for building and leading high-performance teams that execute on business strategies.

Engineering: Amazon Web Services (AWS) • Microsoft Azure • Google Cloud Platform (GCP) • Terraform • SQL Virtualization • System Integration • Disaster Recovery • Firewalls • VPNs • VoIP • Azure Endpoint • Storage • Active Directory • Cloud • SSO • Teams • Zoom • Slack • SaaS • NIST • APIs • GitHub • Jira • Bitbucket

Leadership: • Technical Strategy & Execution • Enterprise Architecture • Business Transformation Technical Planning • Process Automation • Security & Compliance • Customer Engagement • Vendor Relations • Team Building & Leadership • Project Management • Budgeting & Forecasting • Stakeholder Management • Crisis Management • Consensus Building • Agile Development

→ Work Experience

Amphenol Printed Circuits | May 2025 — Current // PCB Manufacturing
Linux Consultant

- Designed and automated full RHEL 9 workstation bootstrap processes, including registration, repo enablement, package installation, user provisioning, SSH key management, and system hardening.
- Developed secure Ansible automation for environment initialization, custom sudoers controls, service accounts, SSH tunneling, and firewalld access.
- Created structured multi-playbook workflows for domain join (SSSD/AD), certificates, updates, inventory management, and control-node bootstrapping.
- Implemented best practices around key handling, system metadata separation, and NOPASSWD command scoping—eliminating security gaps and improving auditability.
- Built custom WSL-based RHEL images and optimized local and remote workstation management through Ansible Tower/AWX callback workflows.

JasprHealth | November 2024 — August 2025 // Startup Healthcare SaaS
System Administrator & DevOps Engineer // Reason for Leaving: Reduction in Force

- Led the effort to prepare for the certification of our application on the Oracle Healthcare Marketplace. This included compliance documentation, conducting in-house security audits, and validating our application.
- Defined CI/CD & IaC standards (Terraform modules, branching, PR reviews, runners) adopted org-wide; cut pipeline steps ~50%.
- Implement cloud cost-cutting measures to save 25% of monthly cloud spend.

- Modernized CICD platform to streamline processes in a large mono-repo, including: dynamic pipelines, incorporation of expo builds (previously manual), introduction of customized Bitbucket runners to decrease pipeline build speed by 50% in some steps, and custom Bitbucket pipes.
- Manage SaaS infrastructure hosted on AWS via Terraform.
- Implement company-wide SSO based on Microsoft Entra ID.
- Consolidate & multiple storage systems and refactor SharePoint usage to provide a single pane of glass for internal collaboration.
- Prepare the company to move from BYOD to company-owned devices to correct compliance issues.
- Prepare customer-facing documentation and lead technical product implementation with customers.

Research Improving People's Lives | March 2021 — September 2024 // B2G research & software firm

Senior Director of Technology | Jan 2023 - Sept 2024 // Reason for Leaving: Reduction in Force

- Scale the development team (2x in 3 months) to accommodate new & expanded projects & workstreams.
- Tailor RIPL products to be implemented within partner cloud environments.
- Manage all vendor relations, cloud accounts (AWS, GCP, Azure), and deployment of internal applications.
- Facilitated the adoption and transition of our production application stack from AWS only to cloud flexible via the use of containerization, migration from DynamoDB to Postgres SQL, and streamlining CICD.
- Managed all aspects of the development team, including weekly 1:1's, team meetings, project assignments, hiring, discipline, promotion, annual reviews, etc.
- Redesigned Research Data Lake (RDL) / Secure Data Enclave (SDE) product to become cloud-flexible (rather than AWS only) and offer greater scalability using customized JupyterHub Notebooks running on Kubernetes.

Director of Technical Product | Jan 2022 – Dec 2022

- Led the build and production deployment of "Pathways2College" application. The Los Angeles School District used this application to help incentivize, educate, and guide students in choosing post-secondary career or educational paths by providing monthly incentives. Built on AWS with an external payment processor.
- Led the technical debt assessment of the existing RIPL "Recommendation Engine" application and subsequent scoping, planning and implementing a new API using Python FastAPI.
- Authored compliance documentation for Secure Data Enclave vetted against NIST 800-171 and validated by a 3rd party security firm.
- Managed all vendor relations, cloud accounts (AWS, GCP, Azure), and deployment of internal applications.

Associate Dir. of Technology | Mar 2021 – Dec 2021

- Standardize tooling used within Secure Data Enclave (SDE) and across all Secure Data Enclave partner environments, including Python, R, PGSQL, and PowerBI.
- Build and implement a customized version of the RIPL SDE to meet a partner requirement of utilizing Microsoft Azure rather than AWS.
- Designed and completed the internal transition from GCP to Microsoft Azure, Office 365, and SharePoint.
- Implemented internal best practices, such as organization-wide security training, dynamic grouping, disaster recovery, and breach response planning
- Provided support for both existing and new staff (O365, Zoom, Slack, GitHub, etc.)

SAU81 | January 2016 – March 2021 // Public School System serving 4000 students and 1000 staff.
Director of Technology // Reason for Leaving: Career Advancement

- Authored and updated the Technology Strategic Plan to bring an environment with no support, updates or maintenance into a fully modern and supported environment.
- Owned enterprise app portfolio (SIS/LMS/HRIS/ERP) and data integrations; reduced duplication and integration failures
- Planned and executed a complete network redesign encompassing seven sites with zero unplanned downtime. This was used to scale from hundreds of basic devices into 10k+ devices, ultimately supporting VoIP, Physical Security, End-user computing, and IoT.
- Developed a data security plan aligned to NIST standards and consulted directly with the state of New Hampshire to implement standards in newly passed data security law for education.
- Built custom software to assign permissions to Individual Educational Plans (IEPs) within an administrative portal that improved access, privacy, and auditing for Special Services.
- Implement, update, and manage numerous data systems, including the Student Information System (SIS), Learning Management System (LMS), Human Resources Data System (HRIS), and Enterprise Resource Planning System (ERP). Author data integrations to move data between systems seamlessly and effectively.
- Responsible for overseeing all technical staff and day-to-day operations.
- Managed a $1.5 million annual operating budget, including planning and adoption, as well as all vendor relations, RFPs, and Bids.

SAU27 | 2010 – 2015 // K12 Public School System delivering services to 3 sites, 1500 students, and 400 staff.
Director of Technology // Reason for Leaving: Career Advancement

- Managed all aspects of technology for a K12 School system

→ Volunteering

Founder, Past President and Past Board Member | NHCTO, 2016 — 2020
//501c3 organization to support K12 Technology Leaders

- Led the organization to become independent of the parent organization and establish its 501c3 status.
- Planned and facilitated monthly membership meetings
- Led the organization of the annual CTO clinic, which doubled in attendance under my leadership.
- Coordinate with vendors to sponsor all events and establish a vendor membership level.
- Oversaw the organization's evolution, established marketing & branding campaigns, was an invited Subject Matter Expert and Guest Speaker at multiple events, and coordinated ongoing professional development.
- Grew the organization to represent over 80% of its target audience in under three years.

→ Education & Certification

M.S. in Information Sciences | University of Phoenix
// 2009-2014

Bachelor of Science in Information Technology | Plymouth State University
// 2004-2008

AWS Certified Solution Architect Associate | Amazon Web Services
Certified Educational Technology Leader | CoSN
Microsoft Certified: Azure Fundamentals | Microsoft
Microsoft Certified Technology Specialists: Administering and Deploying System Center Configuration Manager (SCCM) | Microsoft
Github Foundations | GitHub
Cloud Digital Leader | Google Cloud
HashiCorp Certified: Terraform Associate | HashiCorp
Microsoft Certified: Azure Administrator Associate | Microsoft
